Summer campaign 2014

- PROTEKER, IPEV program 1044 - Summer field campaigns - PROTEKER phase 1: the installation -

Date de mise en ligne : Monday 9 March 2015
PROTEKER 3 (18 nov. 2014 - 18 dec. 2014 on the field) made it possible to achieve the installation of the Kerguelen's underwater observatory (thermorecorders at 5 and 15 m deep and colonization plates at 10 m deep at 8 sites).

Works at sea were done during 3 legs with La Curieuse and with the Commerson:
- Bay of Morbihan, from 24 to 27 november thanks to the Commerson, Zodiac of the Natural Réserve
- Kerguelen north, from 1 to 6 december on board la Curieuse
- Bay of Morbihan, from 7 to 10 december on board la Curieuse
- Kerguelen south, du 11 au 13 december on board la Curieuse

- Sismer Reference FI352014001200

Map of the PROTEKER sites
Twenty four dives have been done. Eight sites are now equipped with two thermorecorder(s) at 5 and 15 m deep. They were all activated for a measure every hour. Colonization plates were installed at the eight sites.

La Curieuse' crew
- Yohann MUCHERIE, Capitain
- Arnaud MICHELOT, Chief ingineer
- Pierre SAMUEL, First mate
- Corentin HEMMER, 2nd ingineer
- Benoît CAFFIER, Cook/Deckhand
- Sébastien LAFFONT, Deckhand
- Vincent BENARD, mechanic trainee

Skipper of the Commerson (RN TAF)
- Romain VERGÉ
