Summer Campaign 2011-2012

- PROTEKER, IPEV program 1044 - Summer field campaigns - PROTEKER phase 1: the installation -

Date de mise en ligne : Thursday 13 March 2014

Programme IPEV n° 1044

PROTEKER 1 (12 dec. 2011 - 9 jan. 2012 on the field) made it possible to chose and begin to install (thermo-recorders at 5 and 15 m) 6 sites. A small number of "tests" species, selected before for their features of contrasted life history (e.g. mode of reproduction), have been collected all around the island to be tested again and to highlight or not a change.
